Additional Information

QuickBooks Desktop: This is a TWO-WAY supported connection, this means you can maintain your banking completely through QuickBooks without needing to log into the First Seacoast Bank portal. This version allows account information to be ported in via QuickBooks automatically due to the 'Direct Connection' established.

All Quicken versions & Quickbooks Online are a One-Way connection only, this means bank data can be imported however any changes made within Quicken or Quickbooks Online will not port over to FSB's side.
